March 10, 2011

To whom it may concern,

Please find enclosed a Section 18 Notice of Specific Exemption along with forms with which to Report Section 18 Applications.

The notice is for the use of HopGuard (hop beta acid) for control of the varroa mite, *Varroa destructor* in Arkansas.

If you have any questions or need further information, please call me at 501-225-1598.

Sincerely,

A handwritten signature in cursive script that reads "Brandi Reynolds".

Brandi Reynolds
Assistant Director
Pesticide Division

HOPGUARD™

For use only as authorized in Arkansas by the U.S. Environmental Protection Agency (EPA) under Section 18 of FIFRA.

Arkansas File Symbol: 11-AR-02
Active ingredient: Potassium Salt of Hop Beta Acids (HopGuard™)
CROP / SITE: Honey Bees / All counties in the state of Arkansas
PEST: *Varroa destructor*
EFFECTIVE: March 10, 2011 to December 31, 2011

- **These use directions must be in the possession of the user at the time of application. All applicable directions, restrictions, and precautions on the product label must be followed.**
- **A report of each application must be filed with the Plant Board within 10 days of the application. Reports may be mailed to: Arkansas State Plant Board, PO Box 1069, Little Rock, AR 72203 or faxed to (501) 312-7053.**
- **Any adverse effects resulting from the use of HopGuard™ under this emergency exemption must be immediately reported to the Arkansas State Plant Board at (501) 225-1598.**

PRECAUTIONARY STATEMENTS

Product may cause eye irritation – flood eyes with plenty of water if contact is made with eyes. Wearing protective eyewear when handling treated strips will reduce the potential for eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT

Applicators must wear chemical-resistant gloves when handling treated strips.

DIRECTIONS FOR USE

Strips must be applied at the rate of one strip per five deep combs covered with bees in each brood super or for example two strips per ten frame brood super (chamber) when all combs are covered with bees. Strips are to be placed only in the brood chamber (not in the honey super). Folded strips must be opened and hung over one of the center brood frames near the middle of the frame with one-half of the strip on each side of the frame. If using a second strip, apply it to an adjacent center frame about four inches away from the first strip. Do not lay the strips on top of the frames. A maximum of three applications per year (six strips or approximately 11.52 grams of potassium salt of hop beta acids) per ten frame brood super (chamber) is allowed. Application timing (usually during spring, summer, and fall) should be based on levels of Varroa mite observed in the colony. Users may not take honey and wax from the brood chambers, only from the honey supers.

RESISTANCE MANAGEMENT

Using this product in rotation with another approved miticide with a different mode of action will decrease the potential for Varroa mites to develop resistance. If the strip remains in the hive more than 4 weeks remove.

Manufactured by: BetaTec Hop Products, Inc., A Division of John I. Haas, Inc., P.O. Box 1441, Yakima, WA 98907
