ARKANSAS  
STATE PLANT BOARD

THE GROWERS LISTED HEREIN HAVE APPLIED FOR CERTIFICATION ON THE VARIOUS CROP VARIETIES. ALL ARE SUBJECT TO FIELD AND STORAGE INSPECTIONS AS WELL AS SEED LABORATORY ANALYSIS BEFORE BEING ALLOWED TO CARRY THE OFFICIAL ARKANSAS CERTIFICATION LABEL. (Listing of a grower does not imply all requirements have been met at the time of publication.)

EACH GROWER HAD THE OPTION TO HAVE THEIR ACREAGE PUBLISHED IN THIS DIRECTORY. IF THE GROWER ELECTED NOT TO HAVE THEIR ACREAGE PUBLISHED, THEN "FD", "REG", OR "BT" WAS PLACED UNDER THE APPROPRIATE GRADE.

The Arkansas State Plant Board Web Site is online). The address is: <http://www.plantboard.org>. The Certified Seed Growers Directory's information is now listed under the Seed Division's link (see bottom of page) on the Plant Board's Web Site to provide you with faster updates for the Certified Seed Growers Directory information.

## SEED PROTECTION: RIGHTS AND RESPONSIBILITIES

### DEFINITIONS:

**1970 Plant Variety Protection Act (PVPA)** - Legislation enacted to promote the development of new varieties by allowing the variety owner to determine who may sell seed of the variety. Farmers may save seed for their own planting needs and sell that amount to a neighbor, if plans for that variety change. All seed sales must comply with state seed laws. Applies to all varieties protected prior to April 4, 1995.

**1994 Amended PVPA** - Amendment to the Plant Variety Protection Act that prohibits the sale of any farmer saved seed without the permission of the variety owner. It also extends protection to tuber reproduced plants, varieties essentially derived from the variety, and harvested material of the variety. Seed protected under the 1994 PVPA must be sold by variety name (except for turf, forage, alfalfa & clover). Length of protection was increased to 20 years for most kinds, 25 years for trees, shrubs and vines. Applies to all varieties protected after April 4, 1995.

**Title V** - an option for protected varieties that allows for the sale of the seed by variety name only as a class of certified seed. Non-certified sales are prohibited. Seed may be called "Certified" only after meeting all requirements and standards of an Official Seed Certifying Agency.

**Utility Patents** - A means of protection for certain varieties, especially those developed through genetic engineering or biotechnology. Farmers may not save, clean/condition, or sell any seed protected under a utility patent.

# QUESTIONS and ANSWERS ON PLANT VARIETY PROTECTION

**Q. What are the benefits of Plant Variety Protection for farmers?**

A. The Plant Variety Protection Act was designed to promote the development of new varieties. Allowing Plant Breeders to determine who can sell seed of the varieties developed gives them the ability to recoup the monies expended in the process and re-invest in future variety development programs.

Researchers estimate that as much as 65% of increased performance in agricultural crops is due to improved genetics. Since 1950, the number of varieties available for Arkansas' major crops have more than tripled! Besides increases in yield, there have been improvements in disease and pest resistance, and varieties that are adapted to various soil types and production practices.

**Q. What changes were made when the Plant Variety Protection Act was amended in 1994?**

A. The major provisions of the 1994 PVPA:

- ◆ Prohibits the sale of any farmer saved seed without the permission of the variety owner.
- ◆ Requires that protected varieties be sold by variety name.
- ◆ Extends protection to tuber reproduced plants, varieties essentially derived from the variety, and harvested material of the variety.
- ◆ Increased length of protection to 20 years for most kinds, 25 years for trees, shrubs and vines.

**Q. How can I tell if the seed I buy is protected under the 1970 or 1994 PVP?**

A. The label on the bag of seed will clearly identify if the seed is protected and distinguish which Act it is protected under.

**Q. Can a farmer save seed of a protected variety?**

A. A farmer can save seed protected under both the 1970 and 1994 PVPA for planting on his own holdings (land owned, leased or rented).

**Q. Can a farmer sell seed of a protected variety?**

A. Under the 1970 PVPA - Yes, but only the amount needed to plant his own holdings.  
Under the 1994 PVPA - No, unless permission is given by the variety owner.

**Q. Can I clean seed for a farmer?**

A. Any actions taken as a step in marketing farmer-saved seed are infringements of the rights of the owner. This can include cleaning excess seed or delivering seed to a third party. Under the 1994 PVPA, cleaning or storing farmer saved seed for sale are infringements. Anyone who cleans or conditions farmer saved seed should keep written documentation from the farmer stating that the seed being cleaned is not in violation of PVP laws or Patents.

**Q. What does PVP Title V protection mean?**

A. If this option is selected by the variety owner, it means the variety must be sold as a class of certified seed. Title V of the Federal Seed Act makes sales of non-certified seed of these varieties illegal.

# TRANSFERING WHEAT FROM ONE CERTIFIED GROWER TO ANOTHER

## USE OF BULK TRANSFERS IN CERTIFICATION

### PURPOSE:

Bulk Transfer forms are used in the certification process to transfer ownership of seed in the certification program from one certified grower / dealer to another. The original intent was for unconditioned seed to be transferred, although this process can be used on cleaned seed. The certified grower / dealer who receives the seed is responsible for completing the certification process on the seed. This includes having an inspector send in a sample for complete analysis.

### FORMS:

Form 24 (Intrastate -within AR-) Bulk Seed Transfer

Form 24 A (Interstate -between states-) Bulk Seed Transfer

### PROCESS:

#### Seller -

1. The Bulk Transfer document (form 24) must accompany the shipment of seed.
2. The seller completes the top portion of the form. This lists the name & address of the original producer, the seller (if different) and the buyer, as well as a description of the kind, variety, grade applied for, lot #, number of bushels in the shipment and date.
3. The seller makes a copy of the document and immediately faxes or sends to the Plant Board.

#### Buyer -

1. The buyer completes the lower portion of the form that came with the shipment. This lists the date the shipment is received, the number of bushels, the transfer of authority for issuance of certification labels, and the buyer's signature/date.
2. The buyer immediately sends the completed form to the Plant Board.
3. The buyer is responsible for completion of certification which includes a complete analysis and bagging/tagging in compliance with certification regulations.
4. If the buyer decides not to complete the certification process and sells the seed as non-certified (if eligible), then he is responsible for complying with regulations regarding an AR Seed Dealer's license and payment of tonnage fees, as well as all labeling requirements.
